### Transitional Planning

*To ensure a continuity of care and return to a healthier living environment, needs are addressed in the transitional plan and developed specifically for each resident. Areas of concern that can only be addressed in the client's home environment are incorporated into the transition plan. The client has scheduled appointments, as needed, with service providers such as community mental health, outpatient substance abuse, and their primary care physician prior to leaving treatment. Additional referrals may include Department of Human Services, Michigan Works, local housing offices, Veteran's Administration, probation and parole officers, and local AA/NA meetings among others.*
